Sledge Hammering with Slide Sledge®

Job specific tips create constant pressure between Slide Sledge® and the intended target. Danger of glancing blows or not impacting the desired area can not be done.

Accuracy and safety built in: Slide Sledge® is the most accurate manually driven impact delivery system in the world today.

Reduces Downtime / Increases Productivity

Eliminates need for special equipment and personnel to do maintenance and repairs in the field, not the shop. Two person jobs can now be done by one person, Faster, Safer and Easier!

Slide Sledge

MULTI-HEAD HAMMER [®]

Application Areas

Designed and tested in the field for two years

Worked with field personnel and management in multiple industries

- Petrochemical
- Military
- Mining
- Railroad
- Maintenance Facilities
- Heavy Equipment OEM's
- Construction
- Road Crews
- Others

Slide Sledge[®] hammers come in four sizes 9, 13, 14 and 21 pounds.

The weight of the drive bar and the length of the tool determine the maximum force each tool can deliver. One of the most important aspects of repairing equipment is to always use the right tool for the right job

Slide Sledge[®] hammers can be used in almost every application a traditional sledge hammer is being used.

Slide Sledge

MULTI-HEAD HAMMER®

Traditional Sledge Hammering

- **Glancing blows** cause damage to wing tab and pipe/iron.
- **Inaccurate hammer swings** cause secondary damage to personnel and equipment.

Traditional sledge hammering often involves one person holding a chisel, while the other swings a sledge hammer. Broken bones, flying shrapnel and equipment damage will result from this process.
