**Anti - Slip Products** are specialized materials, coatings, or devices designed to enhance traction and reduce the risk of slips, trips, and falls in various environments, particularly in areas where surfaces can become slippery due to moisture, oils, or other substances.

These products play a crucial role in promoting safety and preventing accidents in both residential and commercial settings.

## SafeMate Safe Plates

### Specification:

- Providing high friction with non slip steel plate
- Embedded with hard aluminum as grit bonding
- Chemical, heat and frost resistant
- Available in large sizes, planar shape and custom made
- Easy drainage system
- Available in simple bright safety yellow color
- Available in GlowMate version (antislip plates for dark)
- Coated with long lasting 2 part epoxy spray technology
- Customized color, size and gritting for certain applications
- Antislip tested for dry and wet condition and approved by NATA
- Resistant heavy traffic indoors and outdoors

# Safemate Ladder Lung Covers

## Specification:

- Enhanced slip, trip, stumble, and fall prevention
- Available in custom length and sizes
- Available in other colours of choice and also metals
- Profiles to fit all types of stairs such as vertical riser, curved nosing, bevelled nosing and angled riser
- Highest antislip rating – R13 and P5 – as tested by NATA approved, accredited testing facility as per Australian and International standards
- Remains antislip in wet, oily, greasy, dry and dirty conditions
- Impact resistant metal backing capable of withstanding heavy traffic indoors and outdoors
- Tested to and exceeds the requirements of AS/NZS 4586-2004 & ASTM 02047-04
- Manufactured under strict ISO9001-2008 and American Bureau of Shipping (ABS) standards
- Full **10 year** manufacturer warranty

# GlowMate; a Floor Safety Essential

## Specification:

- Compatible with different floorings including Steel, Concrete and Timber
- Available in standard and custom sizes
- Designed with black and luminescent yellow glow in the dark strips
- Compliant with AS/NZS 4586-2004 & ASTM D2047-04 standards
- Manufactured under ISO 9001-2008
- Glows without power supply and batteries
- High visibility
- Glowing for over **8 hours in dark**
- Quick recharge
- Recharges with sun light or dim ambient light
- Robust metal casing
- Available in a variety of sizes
- Green Glow
- Tested to Australian standard
- Used for both indoors and outdoors

## Cable Hooks

- **Safety hooks** for cables are designed with an **S shaped structure** that from one side gets hooked to hoisters, trays, ceiling grids or similar anchorages, while the lower part is used for wires and pipes.
- It caters to small hoses, wires, cables and even small tools such as gloves and safety hats.
- This facilitates keeping a workplace tidy and organized, while preventing trip and fall incidents.

## Cable Guardrail Systems

- **Cable guardrail systems** are made of durable material, UV and chemical exposure resistant, non conductive and above all safe to use for almost any workplace.
- **The Cable Safe Mats** also known as **Cable Barrier Systems** are made from a lightweight and heavy duty polymer material that can withstand industrial grade pedestrian step impact and even light vehicular traffic.

## Pipe Mat Roll

- Made from high traction and **resilient fiber glass (GRP)**, these non-slip rubber mats are designed for easy installation, semi permanent use and permanent fixture.
- **These anti slip rubber mats** are available in safety **black** and **yellow** striped design with standard sizes, and also available for customized sizing and color codes according to your industry.
- The standard varieties can be used as stair tread anti slip products, ladder rung covers, and anti slip door mats.

## Pedestrian & Pipe Hose Ramps

- Also known as **Portable Cable Covers**, pedestrian walking pipe ramps are engineered to create a small bridge over pipes, hoses and cables
- **Drop over pipe protector** is made from premium polyester to withstand impact, and ward off slipping incidents by providing a high traction surface.
- These covers are resilient to the harshest environment and available in two varieties; pre-made and customized based on your demand.

## Drop Safe net / Drop Safe Wire

- It holds the tools safely within a tight grip, and attaches it to a physical anchorage point.
- These nets are also suitable for heavy tools and machineries that cannot be maneuvered easily in usual tether systems.
